CHEEKALA UMESHKUMAR

UI/UX DESIGNER | PRODUCT DESIGNER | GRAPHIC DESIGNER

+91-9603259908 | cheekalaumeshkumar@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

UI/UX and Product Designer with 5+ years of overall experience, including 4 years of relevant design and IT experience. Experienced in responsive web and mobile applications, enterprise dashboards, and role-based workflows across healthcare, e-learning, visa services, event management, and operational platforms. Skilled in user research and collaboration with stakeholders, user flows, wireframing, high-fidelity UI, prototyping, reusable design systems, responsive design, developer handoff, and implementation validation.

CORE SKILLS

UX & Product Design: User Research, User Flows, User Journeys, Information Architecture, Requirement Analysis, Wireframing, Design Thinking

UI & Interaction Design: High-Fidelity UI, Responsive Web Design, Mobile UI, Interaction Design, Visual Hierarchy, Usability-Focused Design and Prototyping

Design Systems & Handoff: Reusable Components, Variants, Design Tokens, Typography, Spacing Systems, Design Specifications, Developer Handoff

Enterprise Applications: SaaS Products, Admin Dashboards, Role-Based Interfaces, Forms, Data Tables, Analytics, Workflow Design

Design Tools: Figma, FigJam, Framer, Adobe XD, Photoshop, Illustrator, Miro, Canva, Penpot, Notion

AI, Web & Quality: ChatGPT, Google Stitch, mobbin, Lovable, Adobe Firefly, Basic HTML/CSS, Bootstrap, Manual UI Testing, QA Sheets, Agile/Scrum.

Collaborations: Jira, Taiga, Notion, Agile/Scrum, Stakeholder Communication, Cross-Functional Collaboration

Visual Design: Branding, Social Media Creatives, Banners, Posters, App Store Assets, Marketing Materials, Video Editing

PROFESSIONAL EXPERIENCE

Billiton Services Private Limited | UI/UX Designer | Dec 2025 – Present

- Design enterprise dashboards and role-based web application workflows based on business requirements.
- Translate requirements into user flows, wireframes, prototypes, and high-fidelity interfaces using reusable components.
- Review development and staging builds with developers, document UI issues, validate fixes, and prepare manual QA sheets.

Intimate Global | Freelance UI/UX Designer | Oct 2025 – Dec 2025

- Designed responsive visa-service journeys, including service discovery, application forms, and document-related interactions.
- Created information architecture, user flows, wireframes, high-fidelity screens, and form validation states.

Vectority Technologies | UI/UX Designer | Dec 2022 – Sep 2025

- Designed web and mobile interfaces for healthcare management and e-learning products from requirements through handoff.
- Created user flows, wireframes, prototypes, responsive UI, and reusable components, collaborated with stakeholders and developers on design reviews.

Technical Hub | Internship - Design / Technology | Feb 2022 – Mar 2023

- Supported design and technology activities while building foundational skills in web fundamentals, responsive design, and collaboration.

SELECTED PRODUCT DESIGN PROJECTS

BeBadge - Expo & Event Management Platform | Dec 2025 - Present

- Created end-to-end web and mobile experiences for event registration, QR passes, exhibitor and visitor journeys, check-in, pass printing, lead management, and analytics.
- Created user flows, wireframes, responsive dashboards, and reusable design-system components across role-based modules.
- Collaborated with stakeholders and developers to validate requirements, resolve UX issues, and ensure accurate implementation.

Outcome: Built a scalable product experience supporting multiple event-management workflows and user roles.

Voice of Bharat - Civic-Issue Reporting Platform | July 2026 - Present

- Designed responsive reporting and case-tracking experiences with community reports, location-based interactions, and multilingual interface considerations.
- Created responsive reporting, community browsing, case tracking, volunteer participation, and location-based interactions.

Outcome: Supported a transparent digital workflow for documenting and tracking community issues across regions.

Telecom / Gas Pipeline Operations Platform | May 2026 - Present

- Designed a web application for staff operations, pipeline/loading activities, and operational workflows.
- Created user flows, dashboards, appointment creation, forms, status tracking, and responsive interfaces based on business requirements.

Outcome: Improved workflow visibility and simplified day-to-day operational task management.

Healthco - Healthcare Management System | Dec 2025 – Jan 2026

- Designed admin-level UI screens, dashboards, forms, tables, filters, and management interfaces for hospital administration.
- Created simple user flows and responsive interfaces while maintaining consistency through reusable UI components.

Outcome: Established a clear UI foundation for the healthcare administration platform.

Intimate Global – Visa Service Platform

- Designed service discovery, multi-step application forms, document interactions, and validation states for a responsive visa-service journey.
- Created user flows, information architecture, wireframes, high-fidelity interfaces, validation states, and guided multi-step interactions.

Outcome: Created a clearer and more structured visa application experience.

Medfidelity – Healthcare Management System | May 2024 – Sep 2025

- Designed role-based healthcare workflows for Admin, Doctor, Nurse, Reception, Billing, Pharmacy, Lab, and Patient modules.
- Created dashboards, forms, and responsive interfaces for OP/IP, appointments, reports, and medicine management.

Outcome: Improved workflow clarity and established a scalable UX foundation for hospital management.

SkillCompute – E-Learning Platform | Jun 2023 – Apr 2024

- Designed course discovery, learner dashboards, course details, progress tracking, and assessment experiences for responsive web interfaces.
- Created user flows, wireframes, high-fidelity UI, and reusable components while simplifying navigation and information hierarchy.

Outcome: Created a clearer and more consistent learning journey for learners.

DESIGN & DELIVERY STRENGTHS

• Translate business requirements into clear, scalable UX flows and UI product experiences.
• Create user journeys, wireframes, interactive prototypes, responsive interfaces, and developer-ready specifications.
• Maintain design-system consistency across typography, spacing, components, and interaction patterns.
• Partner with product Managers, QA, and stakeholders to review requirements, validate implementation, and resolve usability issues.
• Use AI for ideation, content structuring, design exploration, and rapid prototyping without replacing human-centered decisions.

EDUCATION

Aditya University | B.Tech, Electronics & Communication Engineering | 2019–2023 | CGPA: 6.7/10

ADDITIONAL EXPERIENCE

SVVVAP Devotional Organization | Volunteer – Creative & Digital Support | Jan 2020 – Present
