Results-driven UI/UX Designer with over 2.3 years of experience crafting intuitive, user-centered digital experiences across web and mobile platforms. Proficient in Figma, Adobe XD, and Photoshop, with a strong foundation in wireframing, prototyping, responsive design, and design systems. Experienced in Agile/Scrum environments, collaborating closely with developers and product stakeholders to translate business goals into engaging, accessible interfaces. Known for improving usability, streamlining user flows, and enhancing product aesthetics through data-driven and iterative design processes.

WORK EXPERIENCE

UI/UX Designer

Vectority Solutions

12/2023 - Present

Roles&Responsibilities/Tasks

- Designed intuitive and responsive user interfaces for web and mobile applications using Figma, Adobe XD, and other industry-standard tools.
- Conducted user research and, usability testing, and competitive analysis to gather insights and inform design decisions.
- Collaborated with cross-functional teams including developers, product managers, and stakeholders in Agile/Scrum environments to ensure design feasibility and alignment with business goals.
- Developed and maintained the design systems and reusable UI components to ensure consistency across products.
- Worked closely with front-end developers to hand off designs and support implementation, ensuring pixel-perfect execution.

PROJECTS

SkillCompute (E-Learning Domine)

(June 2023 – April 2024)

- SkillCompute is a personalized e-learning platform with progress tracking, quizzes, and certifications.It supports various content formats and adapts to different learning styles for enhanced engagement.

MedFidelity (Healthcare Domine)

(May 2024 – Present)

- Developed clean, intuitive interfaces for patient appointment, doctor slot booking, and admin panel.

Intimate Global (Visa Platform)

(Feb 2025 – April 2025)

- This project streamlines the visa application process through an automated and user-friendly platform. It supports multiple visa types, document uploads, and real-time status tracking for improved efficiency
